Filling spaces questions of Abdomen

28-The hernia sac of the oblique inguinal hernia lies infront of .....and may extend down into .....

29-The skin at the level of the umbilicus is supplied by ..... nerve ,while the skin of hypogastric region is supplied by .....nerve.

30-The Cremasteric muscle is supplied by ..... nerve.
The Cremasteric artery is a branch from .....

31-The nerve supply of diaphragm is from ..... and ....

32-The right Gonadal vein drains into ..... ,while the left Gonadal vein drains into .....

33-The testicular artery is a branch of the ..... , while the artery of the vas is a branch of the .....

34-The transpyloric plane is located at the level of the ..... Vertebra , while the transtubercular plane is located at the level of the ..... vertebra .

35-The subcostal plane is located at the level of ..... while the supracristal plane lies at the level of ..... verteb

36-The Dartos muscle is innervated by .....vertebra responsible for ..... an

37- The medial part of inguinal ligament gives .....

41-The inguinal canal is closed during ..... And .....

42-The external spermatic fascia is derived from ..... At .....

43-The internal spermatic fascia is derived from ..... At .....

44-The paraduodenal fold contains .....

II-Enumerate the followings

1-Ateries supplying the anterior abdominal wall .

2-Nerves supplying the anterior abdominal wall.

3-Nerves supplying the scrotum.

4-The coverings of spermatie cord .

5-Arteries passing through the spermatic cord .

6-Nerves passing through the spermatic cord .

7-Arteries supplying the testis .

and joins the duct of seminal vesicle to form .....

40-The seminal vesicle is separated from the levator ani by .....
and .....

41-The prostate lies above .....and infront of .....

42-The base of the prostate is pierced by ..... ,while its posterior surface is pierced by .....

43-The median lobe of the prostate is related on each side to .....
and lies behind .....

44-The ovarian fossa is bounded anteriorly by .....and.....

45-The ovarian fossa is bounded posteriorly by .....and .....

46-The upper end of ovary gives attachments of .....
and.....

47-The anterior border of ovary gives attachment of .....
which contains .....

48-The narrowest part of uterine tube is ..... ,while the widest part is called .....

49-The medial 2/3 of uterine tube is supplied by .....
While the lateral 1/3 of uterine tube .....

50-The lymphatic drainage of lateral 2/3 of uterine tube drains into .....
while the medial 1/3 of the tube drains into .....

51-The uterus is described as .....and ..... in position

52-The supravaginal part of cervix is related anteriorly to .....
And related posteriorly to .....and.....

53-The fascial ligaments of uterus are ..... , ...
and.....

54-The broad ligament contains two ligaments which are .....
and .....

55-The lateral wall of the upper 1/3 of vagina gives attachment to .....
and.....

.....

66-The ligaments of the penis are .....and .....

67-The superficial dorsal vein drains into ..... ,
while the deep dorsal vein drains into .....

68-The inferior rectal nerve supplies ..... , ...
and .....

69-The pudendal canal starts at ..... and ends at
.....

70-The dorsal artery of penis supplies ..... and .....

37- Seminal vesicles – vas deferens	38-A slight elevation on the trigone – median lobe of the prostate
39-Ampulla of vas – ejaculatory duct	40-Vesicoprostatic plexuses of veins – inferior vesical vessels
41-Urogenital diaphragm – rectal ampulla	42-Urethra – ejaculatory duct
43-Ejaculatory ducts – prostatic urethra	44-Obliterated umbilical artery – external iliac vessels
45- Ureter – internal iliac vessels	46-Ovarian fimbria – suspensory ligament
47- Mesovarium – ovarian vessels	48-Intramural part – ampulla
49-Uterine artery – ovarian artery	50-Para-aortic lymph nodes – superficial inguinal lymph nodes
51-Anteverted – anteflexed	52-Urinary bladder – coils of ileum & sigmoid colon
53-Pubocervical ligament – uterosacral	54-Ovarian ligament – proximal part of

ligament – transverse cervical lig.	round ligament
55- Broad ligament – transverse cervical ligament	56-Perineal body – anococcygeal body
57-Puborectalis of levator ani – deep part of external anal sphincter	58-Levator ani – obturator fascia
59-Deep perineal pouch – superficial perineal pouch	60- The space deep to the membranous layer of anterior abdominal wall
61-Vaginal orifice – bulb of vestibule	62-Membranous urethra – spongy urethra
63-Prostatic utricle – ejaculatory ducts	64-External urethral orifice – prostatic urethra
65- Superficial perineal pouch – deep perineal pouch	66-Fundiform ligament – suspensory ligament
67-Superficial external pudendal vein – prostatic venous plexus	68-Lower surface of levator ani – external anal sphincter – mucosa of lower half of anal canal
69-Lesser sciatic notch – deep perineal pouch	70-Corpus cavernosum –glans penis
