

Miss Noor mohammed Alkashia..
40 y/o female pt married, & and has 2 sons
and 2 daughters she lives in alnaser, she is a teacher
she was in internal medical department after
admitted to the ER for 4 days ago.

The history was taken from the pt herself and she
was cooperative with me

she complains from vomiting 5 days ago.
and diarrhea 18 days ago.

She was in the usual state of health till 18 day
before admission. The ~~condition~~ condition start from
severe recurrent ^{acute} diarrhea, yellow color about 10-12 times
per day and exacerbated with cistagen [become 20 times
per day]
associated with ~~severe~~ moderate colicky abdominal pain
[diffuse] then at last 5 day become epigastric pain
the pain exacerbate before vomiting and relieve
when she take injection in ER.
the pain severity is 7/10 not limit her daily activity
and there is no similar attack.

The vomiting was projectile at the beginning then become
non projectile 3 day ago [food content] normal

[Stomach]

normal color. associated with heart burn.
no dysphagia. , no itching
and sweating. Fever sensation but
not measure it + and she ~~does~~ didn't eat
3 day ago [loss of appetite] there is weight
loss about 3-4 kg ~~is~~ at the last 17 day
~~to~~
